RESEARCH

Gapminder: https://www.gapminder.org/tools/#$chart-type=bubbles
Worldometer: https://www.worldometers.info/
The links above can be used for general interest in real-life data; worldometer gives up-to-date numbers graphs etc on a variety of topics, including up to date figures on coronavirus both globally and on a country-by-country basis. Gapminder is nice for investigating how global statistics have changed over time; it's nice to play around with different variables to see the relationships between them. There are a number of different types of graphs used to represent the data in different ways as well as some videos demonstrating how the data can be used to answer "big questions" all easily accessible from the given link.
